[TODO: Paper Title]

Anonymous CVPR submission

Abstract

[TODO: Abstract: summarize the problem, the proposed method, and the main results.]

1. Introduction

[TODO: Write the Introduction here: background and motivation, research gap, contributions.]

2. Method

[TODO: Write the proposed method here: overall pipeline, GCN-based DFC encoding, knowledge bank, reprogramming, frozen LLM backbone, and training objectives.]

3. Experiments

[TODO: Write the experiments here: datasets, baselines, implementation details, main results, ablation studies, and analysis.]

References

[TODO: Paper Title]

Supplementary Material

4. Appendix

[TODO: Write the appendix here: additional experiments, implementation details, and supplementary analysis.]
